FORWELL™

公司簡介 / COMPANY PROFILE

董事長

高文龍

Wen-Lung Hsiao
President

富偉公司成立於1987年，主要生產自動化、省力化之各種快速換模系統。多年來不斷以創新的技術改良產品，在業界已建立多年的專業形象。

快速換模的功用是在於可快速的更換模具，而換模具時需要高效率的速度、精確的精度及可靠的安全度，在富偉我們不僅確實做到，並不斷創新研發，只為了讓您的模具在作動時更為快速安全。

1997年10月富偉公司是台灣第一家榮獲ISO-9002認證生產快速換模工廠，隔年更獲得CE認證，我們不只是將產品賣給客戶，而是將國際認證的品質一同交付給客戶。1998年因應業務擴充的需求我們成立了富為有限公司，提供客戶更完整的服務。

1999年於大陸成立了中國辦事處，正式進入大陸市場。我們已經歷了17個年頭，未來我們會秉持著"給您最好的"信念不斷的為產品創新改進，將最好的產品及品質服務呈現給您。

品質榮譽 是我們所堅持的

服務回饋 是我們對您的承諾

創新發展 是我們不斷向前的動

公司簡介 / COMPANY PROFILE

We insist excellent quality.

We promise you our service feedback.

To develop creatively is the motive power for us going forward continuously.

辦公室 Office

研發部 Design Department

廠房外觀 Outward appearance of the factory

FORWELL Company had been established in 1987 producing mainly in various automatic and labor saving instant changing molds systems.

We have kept improving the products with advanced technique and built professional image in business field for years.

The function of the instant changing molds lies in being able to change molds quickly, which requires high efficient speed, accurate precision and reliable safety that we FORWELL not only truly meets the requirements but also keeps developin and researching to make you change models safer and more quickly. FORWELL Company was the first model-changing factory approved by ISO-9002 for fast production in October of 1997 in Taiwan as well as got CE Certification the next year.

We not only sell customers the products but also together offer the quality approved by international certification.

We set up FORWELL Co.,Ltd in 1998 on account of business expansion to provide more complete service for the customers.

In 1999, we founded the Chinese office in China and therefore entered the China market formally.

We have gone through for twelve years; we will take the attitude of "Give you the best" to develop and improve the products continuously in the future and present you the best products and service quality.

品質控管 / QUALITY CONTROL

現場工作 Working place on the spot

員工教育訓練 Educational training

檢驗 Inspection

透過工作環境的了解可以知道一個企業對品質的重視。完整的制度及深耕每人心中對品質的要求是我們能成為領先地位的原因之一。

對每個步驟的重視是富偉在每日早會時的重要課題，對使用工具的維護更是我們每天必備的工作流程，對於細節的注重就如同我們對產品的呵護。

從進料檢驗、裁切、加工、研磨、組裝到出貨、售後服務，我們所秉持的是對每一個步驟負責的心態。所堅持的是將產品做好的態度。

Through the understanding of the environment make you know the degree how an enterprise pays much attention to the quality.

Complete system and the quality demand existed in everyone are two of the reasons we take the leadership. Concentrating on every step is the important theme in our daily morning meeting in FORWELL.

Maintaining the operating tools is our necessary work everyday. Looking upon the details is the same as the care on the products we take.

From materials inspection, cutting, processing, grinding, and assembling to dispatching goods and after-sale service, we take the responsibility for every step and insist on making the products perfectly made.

富偉產品系列 / PRODUCTS

Q.D.C.S.

富偉快速換模系統 QUICK DIE CHANGE SYSTEM

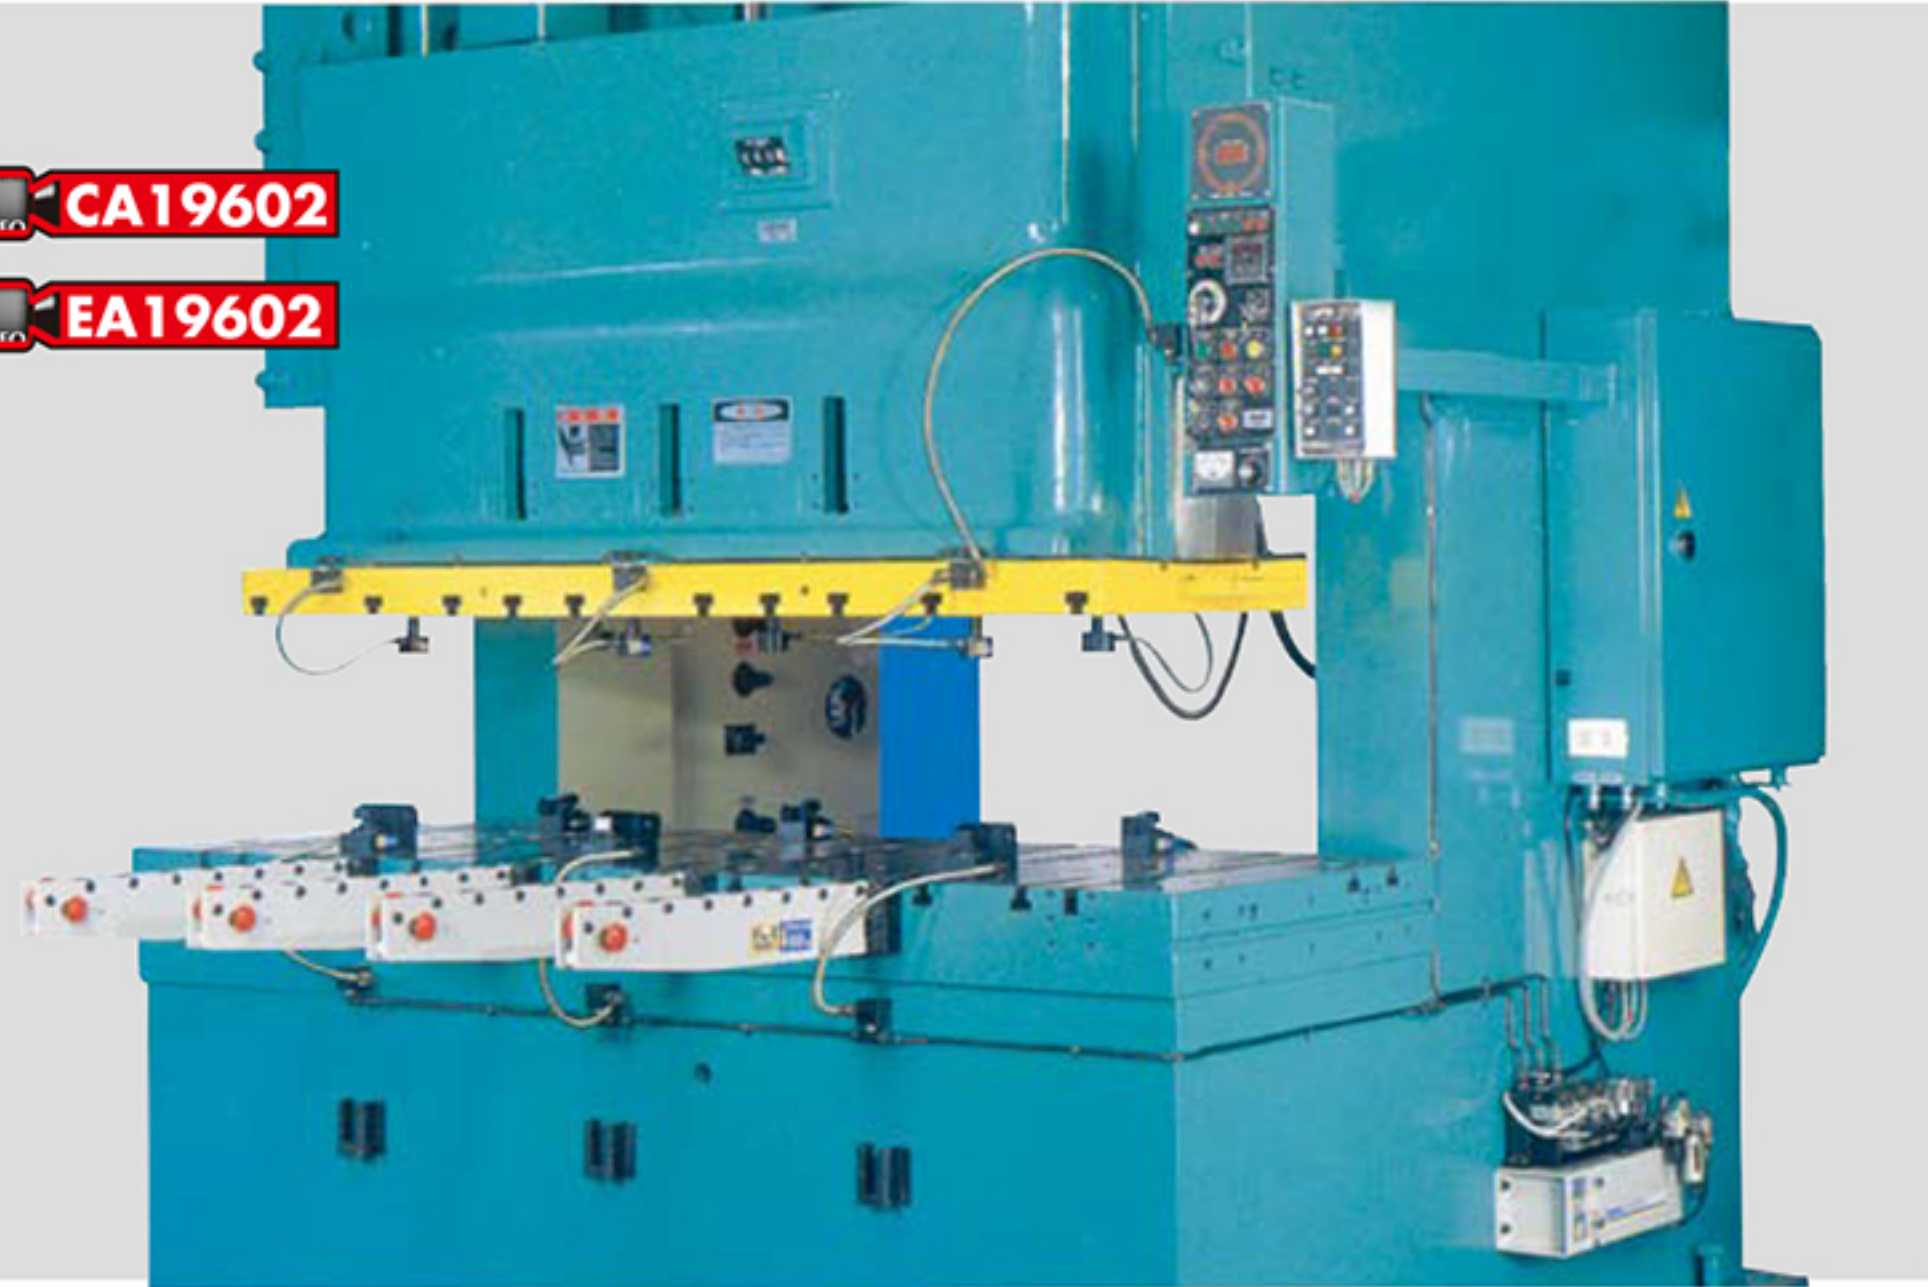

Applications: To be adopted along with various kinds of mold clamping systems for automatic machines such as punch presses, injection molding machines and die casting machines.

適用範圍：沖床、壓床、各種自動化機台夾模系統。

英文版 (ENGLISH)

P.F.P.S.

印刷電路板 油壓沖孔脫料系統 PCB FINE PIERCING SYSTEM.

特性： 操作及調整容易，精確度高，安全又耐用。
適合任何電路板之沖孔脫料作業。
配備快速換模系統，提高生產效率。
達到自動化、省力化，同時提高加工品質的要求。

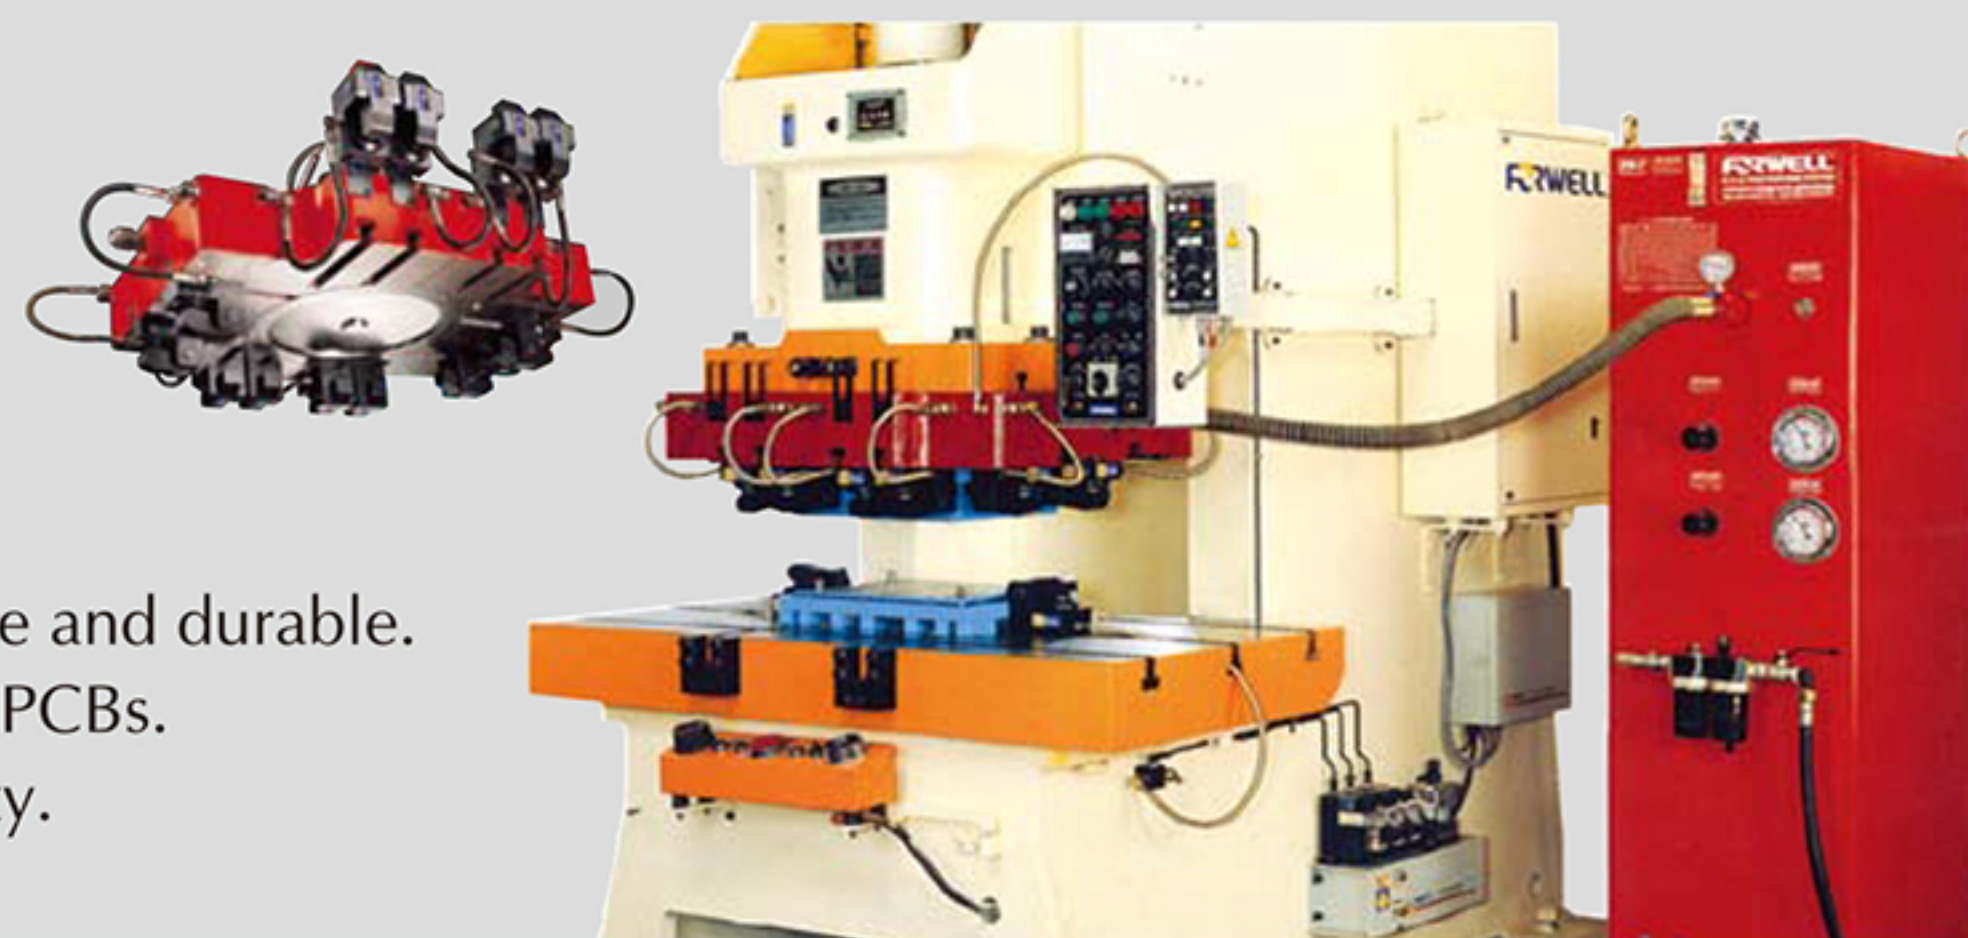

Features: Easy operation and adjustment. Highly precise and durable.
Suitable for the punching and material removing of any PCBs.
With quick mold changing system, increases productivity.
Automatic, labor-saving, and of excellent quality.

富偉產品系列 / PRODUCTS

氣動泵組合系列 PNEUMATIC PUMP COMBINATION SERIES

- 利用空氣壓驅動泵浦產生高油壓壓力。
- 以空氣調壓閥調整壓力達增壓倍數即停止驅動。
- 臨時停電或空氣壓力消失時·油壓壓力仍能長時間保持。
- 適用長時間高油壓壓力保持·省能源、安全、經濟、方便等優點。
- 具壓力開關檢知功能。
- Hydraulic pressure generated by means of pneumatically driven pump.
- Driving is to stop when pressure adjusted by air valve reaches the proper pressure readings.
- Hydraulic pressure will maintain for long time even if unusual power failure happens or air pressure disappears.
- Long lasting high air pressure, power saving, safe, economic and convenient as well as pressure switch-checking function.

夾模器系列 MOLD CLAMPING SERIES

TX型夾模器 具節省空間的好處，但模沿需有”U”溝供其夾持，其底部被製成適合在台盤”T”槽滑動。

TY型夾模器 以槓槓原理作用，夾持模沿，並不需”U”溝因此有更寬廣的適用範圍。

Mold clamping device TX Type saves space but requires U-cut for clamping with its base engineered to be able to slide upon T-slot. The TY Type, however, works according to leverage principles with not need for U-cut for clamping, it good for more applications.

舉模器系列 DIE LIFTER SERIES

DRL/DRB 彈簧式舉模器可藉由填隙片的增減，很容易的適用不同尺寸的T型槽。其長度搭配使用,可產生每100mm的長度變化

DU 滾珠彈簧式舉模器

DL型油壓式舉模器以油壓方式舉模有強力舉模能力適合模具重量變化差異大時使用。

DRL / DRB spring die lifters can easily fit into T-slot by adding or removing spacers. The length varies and 100mm increments are applicable.

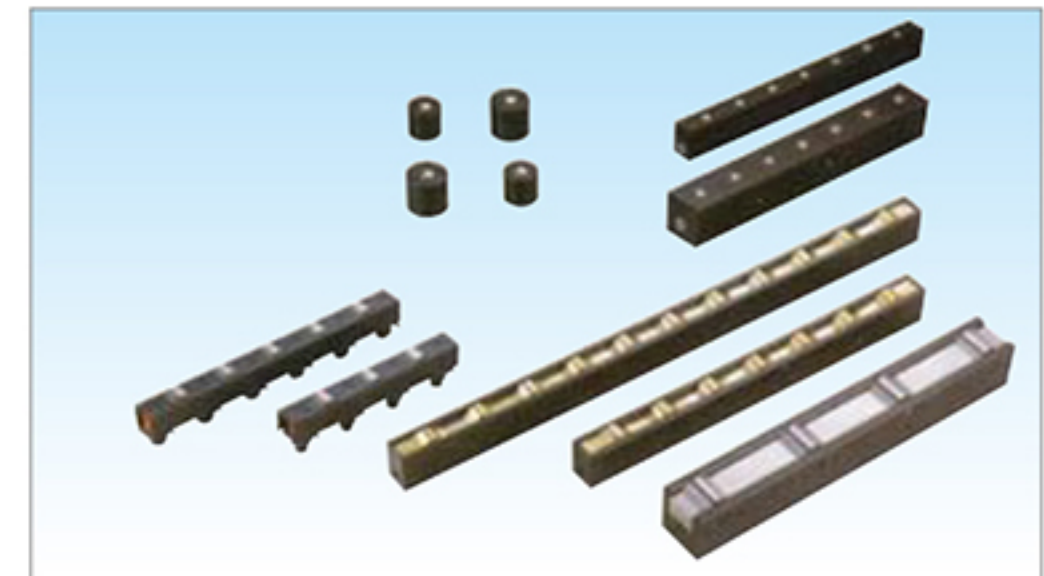

DU spring-loaded roller die lifter

DL hydraulic die lifter lifts up mold by hydraulic method, which is good for mold with significant weight differences.

移模臂系列 BOLSTER EXTENSION SERIES

當您使用起重機或叉架昇降機作模具更換時，共有三種不同的型式設計，包括 RC(移模式)/RD(折下式)/RE、RF(旋轉式)系列，可供選用移模臂的使用，可以使模具更容易的移到沖床台盤的確實位置。

There are three different designs for choosing when you change molds by crane and forklift truck. They are detachable RC Series, drop-down RD Series (alternate model) and folding RE/RF Series which will move mold easily to the correct positions of press machines.
